The complete set of randomly selected student artifacts (n=51) yielded rubric dimension scores that ranged from 3.4 to 3.6. The most common dimension scores were "units of measure" (3.4) and "application of mathematical models" (3.4). Faculty noted that artifacts submitted for courses at or above MTH 1400 were less likely to include "units of measure" or "application of mathematical models" due to the curricular content.
